

Advance-Nilfisk Parts

Advance-Nilfisk Parts - Imagine how long and tiresome it would really be to tidy up after a party, with no help from equipment. Previously, the dust from upholstery and carpets had to be beat out of them by hand; cleaning cloths, brooms, and brushes were the best cleaning products at the time.

P.A. Fisker, the founder of Nilfisk-Advance, was an electrical engineer who really loved working with electrical motors. Establishing the company in 1906, he began to make motors in order to drive machine tools, coffee grinders, drills and fans. Mr. Fisker's vision from the beginning was to own a global business advertising products globally.

The Nilfisk C1 was a tremendous breakthrough for the cleaning industry. This ground breaking vacuum cleaner, invented by Mr. Fisker, weighed only 17.5 kilos and can be operated by a single individual. This creation came in a time where many cleaning machines were very big and required at least 4 operators, hence, the Nilfisk C1 changed everything and developed the method we clean forever. The genius behind these first cleaning machines remains unparalleled. Cleaning equipment offer a brilliant solution to an existing problem; things get filthy and have to be cleaned frequently, without too much effort.

Little by little, the company Nilfisk-Advance developed through the years. In the early nineteen eighties the business expanded fast when the company became a part of the NKT Group. With new owners on board, they concentrated on driving Nilfisk-Advance ahead within the business, trying to be an active global player in producing professional cleaning equipment. Nilfisk-Advance is now represented in every part of the world by gradually acquiring many smaller companies so as to expand their product range and presence in new markets. They are proud to provide a range of cleaning solutions to meet each need.
